grand jury, which is investigating the tragedy at the parish prison and the result of whose labors has been so anxio sly looked fo ward to, will be presented to the public. The jury has been at work on the matter rull; a month now, and a large number of witnesses have been examined from differ-ent walks in life. The government at Washington, in its correspondence with the italian government, has not failed to impres upon the latter the fact that the grand jury of the state of Louisiana was the supreme authorit as to whether there should be a prosecution or not, and the gent'emen of the pary, who represent the sading comme. chal and social interests of the city, are fully alive to the international aspect of the case. The jury held its last se sion on Friday. In that day it adjourned until Tuesday in ring. It is learn a now that he ween be and to test one will be suppressed to the life.

to cr't ens will be summoned to te tify before the lary when it meets on Tues-day, and that when the testimony is all in the jury will be ready to report. Among those who are in the secret of the intention of the jury to sommon so large a number of with sees different theorie, as to the cause the efor are assigned, but the general impression is that these persons will be sammoned to tell who were present in the clowd armed or unarmed, and tacit'y encouraging the come assion of the tragedy. It will not be a discult matter to obtain these names, and the result will be that the jury will return in intenents not only against the persons who led the movement and who signed the card calling the trayer. ing the mass meeting, and those who were in the prison when the actual shooting was done, but against a very large number of citizens who were presented. ent. In other words a very large pro-portion of the community, it is expect-el, will be indicted. It is felt that this would be the proper move, inasmuch as all who went down to the prison and morally supported the movement with their presence are equally guilty with those who were actual leaders and

avengers.
It is also stated on the very best authority that the report will be a sensa-tional one in many respects, and that in the treatment of the tragedy by the jury. New 'rleans and its citizens will not be in arred to any e tent.

United States Pistrict Attorney Grant has not completed the report ordered by Secretary of State Claime. He stated that in an interview this evening.

Many of the procious stones of the Bible have come to prompt recognition. But for the present I take up the re-s valuable ery-tal. Job, in my text, compares saving wisdom with a specimen of Jupaz. An ining will remove the stain from sour hair. Belief chemist or mine releases would propose the reaching season with a specimen of specimen and proposed by the latter worth more than the formation of the latter worth more than the latter worth worth more than the latter wor mer, but Job makes an intelligent comparison, looks at religion and then looks at the crystal and pronounces the former as of sayerror a due to the latter, exclaim the said she had haver soon a Bible before | nex, in the words of my text, "The crystal

> which you accidentally dashed your foot is laid out with more exactness than any earthly city. There are six styles of crys tallization, and all of them divinely ordained. Every erestal has mathematical precision. God's geometry reaches through it, and it is a square, or it is a rectangle, or it is a rhomboid, or in some way it, both a mathematical figure. Now, religion beats that in the simple fact that spiritual accuracy is more beautiful than material accuracy. God's attributes are exact. God's law exact. God's decrees exact. God's management of the world exact-never counting wrong, though he counts the grass blades and the stars, and the sands, and the cycles. His providences never dealing with us perpendicularly when those providences ought to be oblique, not latered when they ought to be vertical. Everything in our life arranged without any possibility of mistake. Each life a six sided prism. Born at the right time; dying at the right time. There are no "hapen so's" in our theology. If I thought thus was a slipsheal universe I would go crazy. God is not an anarchist. -Law, order, symmetry, precision, a perfect square, a perfect rectangle, a perfect rhomboid, a perfect cir-The edge of God's robe of government never frays out. There are no loose screws in the world's machinery. It did not just hammen that Napoleon was attacked with indigestion at Borodino so that he became incompetent for the day. It did not just happen that John Thomas, the missionary, on a heather island, waiting for an outlit and orders for another missionary tour, received that outfit and those orders in a box that that of ashore, while the ship and the crew that carried the box were never heard of. The barking of F. W. Robertson's dog, he tells us, led to a line of events which brought him from the army into the Christian ministry, where he served God with world renowned asefulness. It geometry may be seen in all our life more beautifully than in crystallography. Joh was right. "The crystal cannot equal it."

THE TRANSPARENCY OF BELIGION, Assin I remark that religion is superior o the crystal in transparency. We know not when or by whom glass was first disovered. Beads of it have been found in the tomb of Alexander Severus. Vases of it are brought up from the ruins of Herculaneum. There were female adornments essence of the word "plant" applied to made out of it three thousand years ago-her. She crowdes in the smallest corner; those adornments found now attached to the minimies of Egypt. WHAT IS

SCROFULA

It is that impurity in the blood, which, accomplains in the glands of the neck, produces unsightly lumps or swellings; which causes painful running sores on the arms, legs, or feet; which developes ulcers in the eyes, ears, or nose, often eausing blindness or deafness; which is the origin of pimples, canecrous growths, or the many other manifesta tions usually ascribed to "humors;" which, fasti-ning maon the langs, causes consumption and death. Being the most ancient, it is the most general of all diseases or affections, for very few persons are entirely free from it.

How Can CURED it Be

By taking Hood's Sarsaparilla, which, by the remarkable cures it has accomplished, often when other medicines have failed, has proven itself to be a potent and peculiar medicine for this disease. Some of these cures are really wonderful. If you suffer from scrofula, be sure to try Hood's Sarsapatilla.

"My daughter Mary was afflicted with scrof-

plans sore neck from the time she was 22 months old till she became six years of age. Lumps formed in her neck, and one of them after growing to the size of a pigeon's egg, became a running sore for over three years. We gave her Hood's Sarsaparilla, when the lump and all indications of scrofula entirely disappeared, and now she seems to be a healthy child." J. S. CARLILE, Nauright, N. J.
